

SUMMARY

Next.js focused front-end developer with over 4 years of experience in web development, specializing in Javascript, React.js, Next.js, Express.js, MongoDB, and Mongoose for more than 2 years. Skilled in converting figma design into fully functional pixel-perfect user interfaces, collaborating closely with backend developers, creating reusable components, writing clean and organized code, ensuring scalability and ease of maintenance for future updates by any developer and proficient in Git for version control.

SKILLS

Language and UI Libraries: HTML, CSS, SASS, JavaScript, Tailwind, Shadcn/ui, Material UI
React Ecosystem: React.js, Redux, React Router, Tanstack Query, React Hook Form, Firebase
Frameworks and Backend: Next.js, NextAuth, Express, MongoDB, Mongoose
Development tools: Git, Figma, Axios, Postman, Framer Motion, Zod, Charts
Soft Skills: Writing reusable components, Clean code, Performance optimization, Responsive design.

FEATURED PROJECTS

Book Nest: [Github Link](#) [Live Link](#)

Book Nest is a full-stack e-commerce application built with Next.js, designed for selling books online.

Key Features:

Product Display: Featured, latest and best selling products are displayed in different sections. Users can search (with debounce), filter by formats, authors, categories, price, and rating with pagination.

Shopping Features: Users can add products to wishlist, cart and then checkout with stripe payment gateway. A PDF invoice will be generated and sent to customer and admin email. Users would download their purchased Ebook and Audio Book.

User Authentication: Registration, credential login, social login and logout with NextAuth.

User Restrictions: Users must be logged in to add products to the cart or wishlist. Products intended for the cart before login will be saved and displayed after login.

Admin Dashboard Features: Can see all analytics data in chart, all products, orders, users, uploaded media, edit or add new product, new user and author. Feature some product, change user role.

Other Features: SEO optimized (SSR and SSG), Image optimized, Accessibility, Multilingual, Dark/Light mode, Social share, Responsive.

Technologies: Next.js, React, Next-Auth, Tailwind, Shadcn/ui, Mongoose, MongoDB, Vercel-Blob, Framer Motion, Pdf-lib.

Fluffy friends: [Github Client](#) [Github Server](#) [Live](#)

Key Features:

Implemented Firebase Authentication for secure login and registration. Built an Admin Panel for managing users, pet listings, and donation campaigns. Developed a User Dashboard to manage personal pet listings, view adoption requests, oversee donation campaigns, and track donations with refund options & dark mode.

Technologies: React, Express, MongoDB, Tailwind, React Router, Slick Slider, Firebase.
